myDoo · AI Workspace

From AI user to AI director.

The AI workspace that remembers your company — manage many AI helpers in one place

1 You use several AIs, yet efficiency stays flat → here is how myDoo fixes it

"Many AIs, separate memories."

77% of workers use several AIs weekly (33% use four or more). Each has its own memory, so you repeat yourself: 2.3 hours a week.

"Ten tasks to hand off, one pair of hands."

Only 13% say AI greatly improved results. People still copy answers into documents and re-assign the same tasks weekly.

"I am not a developer, so I struggle to use AI."

AI agent tools need setup and prompt study first. Firms without developers cannot start.

① Memory

One memory in myDoo; explain once to any AI

- Switch AIs and the work carries on
- Grows with use: what you taught and decided accumulates
- Connect your subscription, or subscribe via myDoo

② Team

Staff (AI helpers you train) and Agents take on the work

- Blog, planning, design roles as Staff
- Agents run news clipping and research on their own
- Big jobs: several AIs work in parallel

③ Setup

Install, connect your AI plan, start: no coding

- Give tasks in plain words or screenshots
- Asks before important actions such as sending email
- Reads and writes Word, Excel, PowerPoint and PDF files

Files on your PC · memory in myDoo · subscriptions with each AI. Explain once; efficiency rises right away.

2 How myDoo differs from general LLMs and AI agents

	General LLM / AI agent	myDoo
Memory lives in	Inside that one AI, that one window	myDoo, shared by every AI
If you switch AI	Explain everything again	Carry on where you left off
To hand off work	Write prompts, copy results over	One sentence to Staff or an Agent
To get started	Prompt study, developer setup	Install, connect your plan
Office documents	Copy and paste yourself	Reads and writes DOCX, XLSX, PPTX, PDF
Cost	A separate subscription per AI	Connect your plans; no extra AI fee

3 Customer value in numbers

KRW 0

Extra AI payment (when you connect your existing AI subscription)

The app is free. Connect your ChatGPT, Claude or Gemini plan and AI cost stays what you pay now. AI subscribed via myDoo starts from KRW 19,000/month.

2.3 hrs/week → 0

Time spent re-explaining context to AI

In a survey of 6,000 workers, re-briefing AI takes 2.3 hours a week (Glean Work AI Index 2026). With myDoo you brief once: about 10 hours a month.

0 times

Re-explaining when you switch AI

Memory sits in myDoo, not in one AI, so you can move to a better AI at once. In the same survey, 60% re-enter the same prompt into several AIs.

0 hires, many roles

Split roles even when working alone

Blog, planning, design roles as Staff you train; news clipping and research as Agents from myDoo. Big jobs run in a project with several AIs at once.

Real files, not chat

Office files and your everyday services

Reads the Word, Excel, PowerPoint or PDF you receive and drafts the reply. Connects Gmail, Google Calendar, Telegram and more.

1 install

Barrier to adoption

No developer or prompt training: install it yourself and start. Continue a PC conversation on your phone.

4 Pricing — connect the AI you already subscribe to, and myDoo is free

KRW 0

myDoo Free

Connect your existing AI subscription (ChatGPT, Claude, Gemini) and use the whole app free.

KRW 9,000/mo

Memory backup · web publishing · voice

For cloud backup of memory, publishing documents to the web and voice conversion.

KRW 19,000+/mo

AI from myDoo too

Subscribe to AI inside myDoo, no separate plan · KRW 19,000 / 29,000 / 49,000 / 100,000 / 200,000. International cards accepted.

5 Getting started — three steps, begin on install day

1. **Download from mydoo.ai**
   Windows and Mac
2. **Connect your AI or choose a plan**
   Link your subscription, or subscribe via myDoo
3. **Tell Silky your first task**
   Silky is the in-app AI assistant; memory builds from there

From AI user, to AI director.
